

How it works

Each experience takes place in our 4D immersive dome. Did we mention this also acts as a giant ball pit? Yes, you read that right. Not only will you learn something educational and valuable but you will get to spend your 30 minute slot playing in a ball pit! Once your family has been briefed on the safety aspects of the dome you will be let in to explore. An introductory screen will guide you through the game process. Each activity has pre-selected “special” balls which your family must find in the ball pit in order to learn something. There are a lot of balls in there so you will have to work as a team to find what you are looking for! Once you’ve found the special ball, scan the QR code into the reader at the front of the ball pit. This will bring up the educational aspect of the experience. After a set period of time, you will be prompted to start looking for another special ball. This activity will repeat until the end of your 30 minute time slot. Each experience focuses on a specific educational topic so be sure to come back and try out a different lesson!

personal 30 min slot

generates group play

always educational
